

## Project Design Phase-II

Date	30 October 2022
Team ID	PNT2022TMID04108
Project Name	IOT based smart crop protection system for agriculture
Maximum Mark	4 Marks

### Functional Requirements

FR No	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Visibility	Sensing the presence of animals in the field and protecting the crops against them and notifying the farmer using cloud service .
FR-2	User Reception	Fetching the essential paramters with Temperature, Humidity, Soil moisture sensors are received via SMS
FR-3	User Understanding	Interpreting the quality of land and knowing the need
FR-4	User Action	The user needs take action like destruction of crop residues, deep plowing, crop rotation, fertilizers, strip cropping, scheduled planting operations.

### Non-functional Requirements:

FR No	Non-Functional Requirement	Description
NFR-1	Usability	Mobile support. Users must be able to interact in the same roles & tasks on computers & mobile devices where practical, given mobile capabilities.
NFR-2	Security	Data requires secure access to must register and communicate securely on devices and authorized users of the system who exchange information must be able to do.
NFR-3	Reliability	It has a capacity to recognize the disturbance near the field and doesn't give a false caution signal.
NFR-4	Performance	Must provide acceptable response times to users regardless of the volume of data that is stored and the analytics that occurs in background. Bidirectional, near real-time communications must be supported. This requirement is related to the requirement to support industrial and device protocols at the edge.
NFR-5	Availability	IOT solutions and domains demand highly available systems for 24x7 operations. Isn't a <i>critical production</i> application, which means that operations or production don't go down if the IOT solution is down.
NFR-6	Scalability	System must handle expanding load and data retention needs that are based on the upscaling of the solution scope, such as extra manufacturing facilities and extra buildings.
